Introduction

The purpose of this report is to analyze the sales performance of the Google Merchandise Store using data from the Google Analytics Demo Account. The Google Merchandise Store is an e-commerce platform that sells branded merchandise related to Google. By leveraging the analytical tools provided by Google Analytics, we can gain insights into customer behavior, website performance, and sales trends.

Sales Objectives :

- Improve sales
- Enhance user experience
- Strengthen marketing strategies

Data Exploration

The data used for this analysis comes from the Google Analytics Demo account, specifically focusing on the Google Merchandise Store. The timeframe for this analysis spans the entire year of Feb 16, 2024 to Apr 15, 2025 providing a comprehensive view of user interactions and sales performance over the year.

1-Exploration of sales and traffic sources

This visual shows revenue by traffic source. The highest revenue comes from Direct traffic, followed by Organic Search and Referral. It helps identify which channels drive the most sales.

Top Three Sources:

-Direct (\$1,376,546.29):

-Organic Search (\$624,244.43):

-Referral (\$274,652.72):

Data Exploration

2-Exploration of traffic sources and conversion rate

This visual displays conversion rates by traffic source. Email has the highest conversion rate, followed by referral and Organic Search. It helps measure the quality of traffic.

Data Exploration

3 -Exploration of Product category and sales

Top 5 Categories Analysis

1. (not set) – \$1,828,133.95 (82.47%)

This is the dominant category, but it’s uncategorized, which presents a challenge. Improving data classification and tracking is essential to better understand customer preferences and optimize strategy.

2. Shop – \$123,060.12 (5.55%)

The “Shop” category shows notable customer interest. Focused marketing campaigns could help boost performance further.

3. Apparel – \$90,444.08 (4.08%)

Apparel is a strong performer, indicating a demand for fashion-related products. Expanding this category with seasonal or trending items could drive additional revenue.

4. Lifestyle – \$71,701.64 (3.23%)

This category reflects interest in lifestyle-related products, suggesting potential for growth by aligning with current trends and customer interests.

5. Stationery – \$35,526.90 (1.60%)

While smaller in contribution, this category has potential, especially if targeted toward students, professionals, or creatives with the right products and promotions.

Item category	↓ Item revenue
Totals	\$2,217,419.63
1 (not set)	\$1,828,133.95
2 Shop	\$123,060.12
3 Apparel	\$90,444.08
4 Lifestyle	\$71,701.64
5 Stationery	\$35,526.90
6 Shop by Brand	\$27,135.40
7 Collections	\$16,293.96
8 New	\$12,208.60
9 Clearance	\$9,546.01
10	\$2,841.40

Analysis Of KPIs

The exploration revealed clear differences in conversion performance across traffic sources. Channels like Email and Referral showed relatively higher conversion rates, while others such as Paid Search and Organic Search had lower results. This variation highlights the importance of understanding how different sources contribute not just to traffic, but to actual purchases making Conversion Rate a crucial metric to evaluate overall marketing effectiveness.

Conversion rate & sales by traffic sources

1-Conversion rate:

Conversion Rate Analysis:

The data shows that Email and Referral channels achieved the highest conversion rates at 0.04 and 0.03, respectively, which indicates strong performance in converting users from direct engagement and partner sources.

Problem Description:

The lower conversion rate in some major channels (like Paid Search) may point to ineffective targeting, poor landing page experience, or mismatch between user expectations and content.

S F S S S Free form 2 +					↶ ↷ 👤 ✓			
Session default channel group		↓ Purchase Conversion Rate	Total revenue		Transactions			
Totals		0.01	\$2,621,416.98		17,166			
1	Email	0.04	\$136,579.76		1,060			
2	Referral	0.03	\$274,652.72		2,014			
3	Organic Shopping	0.03	\$7,452.14		91			
4	Organic Social	0.02	\$35,282.97		244			
5	Unassigned	0.02	\$48,068.53		606			
6	Cross-network	0.01	\$28,404.91		244			
7	Organic Search	0.01	\$624,244.43		3,067			
8	Paid Search	0.01	\$89,965.91		367			
9	Direct	0.01	\$1,376,546.29		9,472			
10	Organic Video	<0.01	\$219.32		1			

2- sales by traffic sources:

This KPI shows which marketing channels generated the most revenue. The highest revenue came from the Direct channel (\$1,376,546.29).

- The high revenue from direct traffic indicates strong brand recognition and user loyalty, making it a valuable channel to maintain and nurture.
- Organic search's contribution reflects successful SEO strategies, suggesting that continued focus on content and optimization will sustain long-term growth.
- Referral traffic's performance highlights the potential of partnerships and affiliate programs in expanding the store's reach and attracting qualified users.

3-Average Order Value (AOV):

AOV is calculated by dividing total revenue by the number of transactions.

Formula: $AOV = \text{Total Revenue} / \text{Transactions}$

AOV is calculated as Revenue divided by Transactions.

- Email: $\$136,579.76 \div 1,060 = \128.85
- Referral: $\$274,652.72 \div 2,014 = \136.38
- Direct: $\$1,376,546.29 \div 9,472 = \145.36

This suggests that users coming via Direct traffic tend to spend more per order.

Segmentation Analysis

Customer behavior analysis plays a vital role in enhancing business decision-making by providing deeper insights into how different customer groups interact with a company's products or services. By analyzing behaviors such as browsing patterns, purchase frequency, and engagement levels, businesses can detect emerging trends, predict future needs, and tailor their offerings accordingly. This approach not only improves customer satisfaction but also maximizes profitability by aligning business strategies with actual user behavior. Ultimately, behavior analysis supports data-driven decisions that lead to sustainable growth and competitive advantage.

User Demographics:

let's assess user characteristics such as country, gender, and age

top 3 country

1. Dominance of the U.S. Market

The United States ranks first with \$2,311,439.78 in revenue, accounting for 91.5% of the total. This highlights the U.S. as the most profitable market, suggesting a need to prioritize marketing investments or .distribution efforts here

2. Canada

a ranks second with \$124,614.14 in revenue (approximately 4.9% of the total). While smaller compared to the U.S., this indicates potential for expansion through targeted strategies tailored to this market.

3. Emerging Asian Markets

Taiwan ranks third with \$18,235.54 followed by Japan and Singapore. These Asian markets show growth potential, which could be amplified by improving market presence orculturally .adapting products/services

The screenshot shows the Google Analytics GA4 interface for 'Google Merch Shop'. The main table displays 'Purchase revenue' by 'Country' for 'All Users'. The United States is the top performer with a revenue of \$2,311,439.78, which is 91.5% of the total. Other countries listed include Canada, Taiwan, Japan, Singapore, Mexico, Indonesia, Brazil, South Korea, and India.

Segment	All Users	Totals
Country	Purchase revenue	*Purchase revenue
Totals	\$2,525,915.92 100% of total	\$2,525,915.92 100% of total
1 United States	\$2,311,439.78	\$2,311,439.78
2 Canada	\$124,614.14	\$124,614.14
3 Taiwan	\$18,235.54	\$18,235.54
4 Japan	\$8,799.54	\$8,799.54
5 Singapore	\$8,355.66	\$8,355.66
6 Mexico	\$7,187.09	\$7,187.09
7 Indonesia	\$5,220.91	\$5,220.91
8 Brazil	\$4,991.96	\$4,991.96
9 South Korea	\$4,750.71	\$4,750.71
10 India	\$3,885.58	\$3,885.58

Age segment

Segment by Age:

- 25–34: 9,665 engaged sessions
- 18–24: 12,312 engaged sessions
- 35–44: 4,937 engaged sessions
- 45–54: 3,656 engaged sessions
- 55–64: 1,226 engaged sessions
- 65+: 785 engaged sessions

Insights and Implications:

The largest user group by engagement is 18–24, followed closely by 25–34 and 35–44. These age segments represent digitally native users who are highly familiar with online platforms and responsive to well-crafted digital experiences.

- To capitalize on these segments:
- Tailor marketing messages to resonate with their interests, values, and communication styles.
- Focus on social media channels and influencer collaborations that are most popular among these age groups.
- Offer products that align with their lifestyle, such as tech accessories, trendy apparel, or convenience-based services.
- Implement loyalty and referral programs to deepen engagement and encourage word-of-mouth.

Gender segment

Gender Overview:

- Male: Around 21,000 engaged sessions
- Female: Around 15,700 engaged sessions (approximately 75% of male users)
- Unknown: Higher than both known genders, with 47,700 engaged sessions

Insights and Implications:

- The gender distribution indicates that while male users show slightly higher engagement, the platform still reaches a significant number of female users. However, the gap—along with the large “unknown” category—suggests that:
- Marketing may be skewed slightly toward male audiences.
- There’s a strong opportunity to strengthen female engagement through campaigns tailored to their interests, such as curated product collections, influencer collaborations, or targeted promotions.
- Additionally, reducing the “unknown” gender category through improved data collection (e.g., better profile setups or analytics tracking) could provide clearer segmentation and help tailor experiences more effectively.

Analytical Techniques Applied

Several analytical methods were used to find insights and pinpoint areas for development during the performance analysis of the Google Merchandise Store:

1. Descriptive Analysis
2. Comparative Analysis
3. Segmentation Analysis
4. Trend Analysis
5. Correlation Analysis

Findings

Several significant conclusions were drawn from the examination of the Google Merchandise Store sales performance between February 16, 2024, and April 15, 2025:

- Direct Traffic Dominance:
- Organic Search Effectiveness:
- Referral Traffic Value:
- High Engagement via Organic Shopping and Email:
- Referral and Organic Search Strong Engagement:
- Affiliate Traffic:
- Seasonal Revenue Trend:

Recommendations

The following recommendations are derived from the analysis's findings to enhance the Google Merchandise Store's user interaction and revenue:

- Strengthen Direct Traffic Loyalty:
- Enhance SEO Efforts:
- Expand Referral Partnerships:
- Focus on Organic Shopping and Email Marketing:
- Leverage Highly Engaged Channels:
- Optimize for High-Performing Demographics:

Revenue over month

- The end of the year is the most profitable:
From September to December, the company achieves the highest revenue, probably because of the back-to-school or holiday season.
- The beginning of the year is weak:
January and February record the lowest revenue, possibly due to slowing spending after the holiday season.
- The middle of the year is relatively stable:
Months such as 05, 06, 07, 08 have close percentages (between 4% and 8%), without jumps or sharp decreases

Number of purchases

- Peak Times:
There is a very pronounced rise in purchases during September and October.
A second summit appears near February and March.
- The most purchased product:
Google Sticker and Google Cloud Sticker seem to be the most requested.
- Sales Disparity:
There is no stability, but periods of intense activity and periods of stagnation

Conclusion

This comprehensive analysis of the Google Merchandise Store's performance, spanning from January 1, 2024, to April 15, 2025, provides critical insights into sales trends, user engagement, and marketing effectiveness, based on data from the Google Analytics Demo Account.

1. **Dominance of Direct Traffic**
2. **Strong Organic and Referral Performance**
3. **High Engagement from Specific Channels**
4. **Insights from Product Categories**
5. **User Demographics and Behavioral Segmentation**
6. **Challenges and Opportunities**
